

# Mesh Partitioning

**Create protected space in work areas in automated warehouses with manufacturing robots.**

Areas are kept free of any material ejected by machines in motion.

Different areas can be enclosed with multiple combinations of: four different panel lengths, two pillar heights, double- or single-access gates, sliding doors, opaque sections, mesh zones, irregular-shaped perimeters, mobile features, etc.

**Advantages**

- **Modular system** adapts to each area.
- **Fast and easy** to assemble.
- Straightforward **enlargement** and **modification**.
- Designed according to European **occupational health and safety standards**.

Protection of roller conveyor zones

Control and maintenance zone partitions

Chemical products area

## APPLICATIONS

- **Separate and internally divide** different areas within a company's facility.
- Close off **manufacturing** zones with machinery in-motion.
- **Protect** roller conveyor **circuits**.
- **Separate** waste sorting **areas**.
- **Partition** off control and maintenance **zones**.
- Safeguard **chemical products** areas.
- Isolate **substations**, transformers and electrical panels.
- **Mark** the boundaries of loading **areas**.
- **Enclose rack areas** reserved for stacker crane traffic.
- Partition off **storage systems**.

## BASIC COMPONENTS

1. Metal partition panel
2. Pillar
3. Hinged pillar
4. Safety shutoff switch
5. Anchorage
6. Access gate

### Modules

Interchangeable opaque or mesh partition panels.

Initial mesh module

Extra mesh module

Opaque initial module

Extra opaque module

Mixed initial module

Extra mixed module

### Doors

Gate dimensions

Type	Measurements (mm)
Single	1,033 (to pillar axes)
Double	2,006 (to pillar axes)
Double sliding	1,990 (opening) / 5,396 (fully open door span)

Single door. Opaque or mixed metal mesh

Double door. Metal mesh

Double sliding door system. Metal mesh

## ACCESSORIES

### Emergency alert system

For installations where immediate evacuation of personnel may be required.

### Safety shutoff switch

Cuts power to the machinery when a door opens.

### Hinged panel

Serves a wide range of possible arrangements.

### Plastic finish

Adjust to different on-site obstacles.

### Standard colours

Finished in powder epoxy-polyester paint.

**Pillar**  
RAL 5003

**Door**  
RAL 7032

**Panels**  
RAL 7032

Other non-standard colours available on request.

## SAFETY AND PROTECTION

### Design standards

The design and installation meet all safety requirements, in accordance with the standards in force in each country, e.g.:

- EN ISO 12100
- EN ISO 13857
- EN ISO 14120

### Legislation and enforcement

The use of appropriate protection on machines is outlined in the current international and countrywide legislation on occupational health and safety.

These standards, whether regarding machines — Directive 2006/42/EC — or their usage, state the need to protect people against the inherent risks involved in handling all types of machinery.
